

1-2" Mulch Specifications Cut Sheet

Product Description

- 1-2" mulch is a composted material, dark brown in color with fine particulates and larger components up to, but not exceeding 2" inches in size.
- Composition is of recycled organic green material, cleaned and sorted at our composting facility to ensure content.
- The material is composted for a minimum period of up to 60 days, at high heat to kill pathogens and weed seeds. This process meets California Title 14 regulations.
- Material is aged until fully composted.
- STA approved by the US Composting Counsel.

Benefits of Usage

- Increases water retention of various soils, slowing evaporation rates.
- Enhances plant material growth and longevity, by improving soil content, replenishing nutrients and minerals, and increasing microbial activity.
- Aides with disease suppression by strengthening the overall health of plant material and their root systems.

Application

- Mulch is typically applied at a rate of 8-10 yards per 1000 square feet.
- The amount is dependent upon the depth specification or recommendation.
- Application can be done by hand or using blower trucks depending on accessibility of the site.
